

# DIABETES & YOUR EYES

Protect your vision with regular, dilated eye exams from your doctor of optometry.

**FACT #1:** In 2018, doctors of optometry diagnosed more than **301,000** cases of diabetic retinopathy in patients who did not even know they had diabetes.

**FACT #2:** People with diabetes are at **higher risk for eye diseases**, such as glaucoma, cataracts, and diabetic retinopathy.

**FACT #3:** Unfortunately, only **54 percent of people with diabetes regularly visit their doctor of optometry**, according to American Optometric Association's American Eye-Q<sup>®</sup> survey.

**Early detection and treatment can save your vision. No online app can do that.**
