Archive of ACOE Accreditation Actions and Decisions – July 27, 2020

Consistent with Accreditation Council on Optometric Education (ACOE) policy, the ACOE publishes the following information about accreditation and pre-accreditation decisions:

- the type of program (professional optometric degree, optometric residency or optometric technician);
- the program's sponsor, and in the case of an optometric residency not sponsored by a school or college of optometry, the name of the affiliated optometric institution;
- accreditation status or action;
- the year of the next currently scheduled site visit; and
- the Council's summary of compliance with the standards, which specifies the Council's basis for any final decision. Updates to the summary of compliance will be published in subsequent reports of ACOE meeting actions when the ACOE determines that the standards are met.

Definitions of pre-accreditation classification and accreditation status

July 27, 2020

At its June 26-27, 2020, virtual meeting, the Accreditation Council on Optometric Education (ACOE) took the following actions: (Note: Date in parenthesis is the date of the next currently scheduled evaluation visit to the programs. Depending on the outcomes of annual reports, progress reports, interim visits, substantive program changes and other significant events affecting a program, the Council may decide to schedule a full on-site evaluation visit before the original accreditation period is complete. The accreditation period is eight years for professional optometric degree, optometric residency and optometric technician programs.)

1. Pre-accreditation Actions: None

2. Initial Accreditation

Classification of "Accredited" granted following a virtual site visit (with an on-site visit to be conducted within a reasonable timeframe)

University of Pikeville Kentucky College of Optometry Professional Optometric Degree Program

Initial accreditation awarded as of April 22, 2020. (2028). The program was granted the status of Accredited, effective as of April 22, 2020, based on the Council's determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the eight standards for professional optometric degree programs.

3. Continuing Accreditation

Classification of "Accredited" continued following a full site visit:
Chillicothe/Columbus VA Residency in Ocular Disease & Primary Eye Care, which is affiliated with the Ohio State University College of Optometry (2028). The program was granted the status of Accredited, based on the Council’s determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I and V following a site visit in 2020 and based on subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

Clayton Eye Center Residency in Primary Eye Care/Emphasis in Ocular Disease, which is affiliated with Nova Southeastern University College of Optometry (2028). The program was granted the status of Accredited, based on the Council’s determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I, II and V following a site visit in 2020 and based on subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

Pennsylvania College of Optometry Residency in Low Vision Rehabilitation (2028). The program was granted the status of Accredited, based on the Council’s determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I, II and V following a site visit in 2020 and based on subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

Pennsylvania College of Optometry Residency in Pediatric Optometry/Vision Therapy (2028). The program was granted the status of Accredited, based on the Council’s determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I, II and V following a site visit in 2020 and based on subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

Pennsylvania College of Optometry Residency in Primary Eye Care/Ocular Disease (2028). The program was granted the status of Accredited, based on the Council’s determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program was issued recommendations to meet Standards I, II and V following a site visit in 2020 and based on subsequent progress reports submitted by the program, the Council found the recommendations to be met. The program now fully meets the six standards for residency programs.

Ralph H. Johnson VAMC Residency in Primary Care Optometry, which is affiliated with Southern College of Optometry. The program was granted the status of Accredited, based on the Council’s determination that the program has no deficiencies or weaknesses that compromise the educational effectiveness of the total program. The program fully meets the six standards for optometric residency programs.
4. Reconsideration of Accreditation Denial: None

5. Withdrawal of accreditation by ACOE:

   Accreditation withdrawn following submission of progress report:
   Albuquerque VA Residency in Ocular Disease, which is affiliated with University of Houston,
   College of Optometry

6. Voluntary withdrawal of accreditation: None

Definitions

Pre-Accreditation Classification-In the case of a program which is not fully operational, the Council may
grant the pre-accreditation status of preliminary approval following satisfaction by the program of the
requirements for initial application in Chapter 4 and the Council's review of an evaluation team report
following a site visit.

Preliminary Approval-A pre-accreditation classification granted to a professional optometric
degree program that has clearly demonstrated it is developing in accordance with Council standards.
The program has approval to begin student recruitment, selection and admissions and to begin offering
the program. The Council shall review the preliminary approval classification annually during the first
three academic years of the program through written reports and/or site visits as deemed necessary by
the Council. A request for accreditation status shall be made not less than 12 months prior to graduation
of the program's first class. As required by the USDE, the Council will not grant pre-accreditation status
to a program for longer than five years. When the Council awards preliminary approval to a program or
at any time during the Council's monitoring of a program holding preliminary approval status, the ACOE
may issue recommendations or specify conditions for monitoring, which must be attained in order to
maintain the pre-accreditation status.

Accreditation Status

The ACOE may decide to grant one of the two following accreditation statuses to a program following
adoption of the evaluation team report and recommendations. Accreditation status may be lowered or
revoked if the Council determines that the program is not making sufficient progress on
recommendations from the Council.

Accredited-A classification granted to an educational program indicating that the program generally
meets the standards for accreditation. This classification indicates that the program has no deficiencies
or weaknesses that compromise the educational effectiveness of the total program. However,
recommendations relating to marginal compliance with certain standards, and suggestions relating to
program enhancement may be included in evaluation reports.

Accredited with Conditions-A classification granted to an educational program with major deficiencies
or weaknesses with reference to the standards of accreditation. This classification indicates that the
educational effectiveness of the program is in jeopardy. Programs with this classification will be required
to submit progress reports and shall undergo a full on-site evaluation visit within a prescribed period of:
one year for programs that are less than one year in length; 18 months for programs that are at least
one year in length but less than two years in length; and two years for programs that are more than two
years in length.

Accreditation manuals containing information on the ACOE's policies and procedures may be found in
the Accreditation Resources section.
