ICD-10 Part IX: Post-Procedural Complications

1. Where would you begin when locating a diagnosis code
   a) Always begin with the Tabular Listing under the H section
   b) Always begin with the last code you used
   c) **Begin in the Alphabetic Index**
   d) Begin in either the Alphabetic Index or the Tabular Listing, your choice

If you have listened to any of the previous webinars, you will already know this answer and why this tip is important.

2. No matter what the cause of the pain is or the reason for the visit, you would always use the code- R52
   a) True
   b) False

R52 is General acute pain and exclude site specific acute pain. There are specific causes of ocular pain that could be coded in addition to the Ocular pain diagnosis code.

3. You would use an additional code further describe some surgical complications from the following section:
   a) Y92-Y99
   b) Y22-Y42
   c) W56-W85
   d) **Y62-Y82**

*Complications of surgical and medical care, not elsewhere classified (T80-T88)*

*Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)*

*Use additional code(s) to identify the specified condition resulting from the complication*

*Use additional code to identify devices involved and details of circumstances (Y62-Y82)*
4. Is a 7th character ever used when coding postsurgical complications?

a) Yes
b) No

For mechanical complications of surgery with internal prosthetic device or implant

T85 Complications of other internal prosthetic devices, implants and grafts

Excludes2: failure and rejection of transplanted organs and tissue (T86.-)

The appropriate 7th character is to be added to each code from category T85
A - initial encounter
D - subsequent encounter
S - sequela
