

Note: To use AOA MORE for MIPS reporting, update to at least version 6.0.7

When a new version of Practice Director is available, you will receive a notification in the lower right corner of Practice Director, or you can check the availability by selecting Main>Software Update, in the upper left corner.

1. Verify that your computers meet our recommendations:

https://www.practicedirector.com/.../PD_Hardware_Recommendati...

2. Start Training, Release notes and Training video list available on our Client Documentation site:

<https://www.practicedirector.com/client-documentation/>

From Practice Director select Help>Client Documentation and then select Version 6.0 Documentation.

We are requiring that you watch the training videos in order to obtain support on new functionality.

3. Review the Update and Conversion Instructions to 6.0.x located on our client documentation

site <https://www.practicedirector.com/.../UpdateandConversionInstr...>

If you are already on a version of 6.0 use Update Instructions for Version 6.0.x document on our client documentation site

<https://www.practicedirector.com/pdf/Update%20Instructions%20for%20Versions%206.0.x%20to%20Subsequent%20Version.pdf>

4. Call support if you have any questions about functionality coming in 6.0 or to request access to our 6.0 training database for hands on practice. If you have completed the above steps and do not have notification to update, please call support and request to be added to the update list.
