

Be Scary But Safe This Halloween!

Decorative lenses are a fun way to change your look. But, illegally purchased lenses can be dangerous and possibly damage your eyes!

Visit aoa.org for more information or to find an optometrist near you.

Here are some tips to keep your eyes safe:

1 Have an in-person, **comprehensive eye examination** to make sure your eyes are healthy

2 Contact lenses are medical devices! Only buy your lenses from a **doctor of optometry**

3 Never buy your lenses from retail outlets, or from online sites that **don't require a prescription**

4 **Don't share your lenses** with friends or family
